MAXXCORD® ULTRA™

ULTRA High Density baling experts value Ultimate baler twine Performance. CordexAgri® launches its premium UHD baler twine Maxxcord® Ultra™. It always delivers the highest density bales possible.

- TOP BALING PERFORMANCE
- SUPERIOR BALE DENSITY
 - LESS TRANSPORT
 - LESS STORAGE COSTS
- ULTRA HIGH QUALITY
- FOR BALING EXPERTS
- THE ULTIMATE TWINE FOR UHD BALERS

Cordex has worked closely with AGCO’s Hesston factory during development of the new UHD Large Square Baler and has invested in new machinery and processes during this extensive R&D process to create state of the art, unique production technologies for **Maxxcord® Ultra™**. No other cordage company in the world is as well prepared with knowledge and skill, to create an Ultra High Quality twine especially for UHD Balers, used in all conditions and all crops.

REFERENCE	WEIGHT	RUNNAGE	SPOOLS/ PALLET	KNOT STRENGTH	COLOR
MAXXCORD ULTRA	12,6 KG SINGLE SPOOL	80M / KG	84	340 KG/F	Pink

The most suitable twine for the brand New AGCO UHD Balers – MF 2370 UHD / Challenger 2370 UHD / FENDT Squadra 1290 UD.

Maxxcord® Ultra™ will allow baling experts to produce Ultra High bale Density, reducing transport and storage costs and opening up new opportunities. **Maxxcord® Ultra™** used in new UHD Balers – MF 2370 UHD / Challenger 2370 UHD / FENDT Squadra 1290 UD will allow an increase of at least 20% bale density when compared with previous AGCO HD square balers.

With Maxxcord® Ultra™, you can always “Bale with ULTIMATE STRENGTH”.
